Volunteer experience

buildOn mission, Nepal

In 2018, I joined several colleagues from around the world on a mission to Nepal. Much of the region experienced heavy damage during the earthquakes of 2015. Our group raised the necessary funds and helped with the physical construction of a three-room school in a remote region. The school has since been completed and will provide additional classroom capacity to educate and improve the lives of those living in the surrounding areas for many years to come.

ChildHope mission, Peru

In 2017, I took part in a week long journey visiting several schools across Peru, particularly ones in economically challenged environments. Activities included playing sports with students, painting murals, teaching English, and photographing the experience. I also worked with teachers in one location to troubleshoot technical difficulties they were having with computers. Upon returning from the mission, I created an online blog and video in collaboration with the sponsoring foundation.
